• PRODUCT CARE AND MAINTENANCE

1. For Vanity Cabinets and Tallboy

General cleaning using a mild household spray and wipe down the door or panel with a soft cloth taking care not to rub too hard. Dry using a soft cloth so as not to leave any residue on panel. Thoroughly clean over the wider area with water and detergent on a damp cloth. Always ensure that you refer to the recommendations provided by the cleaning product manufacturer before use.

- (a) The vanity must not be exposed to excessive moisture, e.g. directly beside a bath or open shower.
- (b) The material used in the manufacture of Sunny vanities are water resistance, NOT WATERPROOF. Care must be taken to dry any excessive moisture or water spillage.
- (c) Never expose any part of the vanity to solvent based cleaners.
- (d) If the installation is likely to encounter excessive moisture, please consult your merchant for further advice.
- (e) The vanity must not be exposed to excessive heat, e.g. close to heater.

2. For Ceramic Basins and Vanity Tops

Vitreous China and Stone tops are very easy to care for. Simply rinse thoroughly with soapy water and use a soft cloth to wipe the product dry after each use. A mild abrasive cleaner such as Ajax or Jif, may be used for more heavy duty cleaning. Have to avoid applying strong abrasive cleaners or pads, since they will remove the gloss or matte finish and scratch and dull the surface.

To remove lime scale deposit, simply use household vinegar to help. For stubborn stains, a lime scale remover for bathroom products can be used.

- (a) Avoid soft-scrub type of cleaner on a regular basis.
- (b) Avoid strong abrasive cleaners, since they will remove the gloss or matte finish and scratch and dull the surface.
- (c) Do not use harsh chemicals such as domestos. They will destroy the chrome from overflow caps and/or cause deterioration of the rubber seals in the wastes.

3. For Solid Surface

Regular cleaning will assist to keep your solid surface looking fantastic and reduce wear and dirt build up. Spills should be cleaned promptly. Clean with a mild detergent or soapy water and a soft cloth, sponge or non-scratch scourer.

Important notes: It is important that the cleaning instructions for Solid Surface are not carried out on the alternate material. Damage may occur which will void your warranty.

- (a) For stubborn marks start with the non-scratch scourer and a mild detergent, if required use a diluted very mild abrasive cleaner cleaning in light circular motions.
- (b) For extreme marks and light scratches, a very light buff in circular motions using the finest grade sand/glass paper will restore the surface. A heavier grade of sandpaper will scratch the surface which can be removed by then using a light sand paper. Avoid applying excessive pressure or clean/rub the same area for a prolonged time unless repairing a scratch or damage.

Always test 'non scratch' and 'mild abrasive' products in a non-conspicuous area first to ensure suitability as brands can differ.

To maintain a uniform appearance, you may need to clean the entire surface. Never use sharp products such

as steel wool or aggressive, commercial grade/strong cleaners or chemicals (e.g. acetone, trichloroethylene, acids, and caustic soda) as these may damage and scratch the surface. For best results always finish by wiping surface clean of all detergents and dry with a soft clean cloth.

4. For Mirrors and Shaving Cabinets

When cleaning is required we recommend a soft, damp cloth and water. If a detergent is needed it should be a mild one like soap or washing-up liquid. Always avoid using detergents that contain alcohol and ammonia or ones that have an abrasive or bleaching effect.

(a) Heavy articles should not be placed on the mirror cabinet, for example, heavy cleaner or glass articles. In any event of a spill, wipe immediately.

(b) Avoid using acidity or alkali silica gel to install the mirror, or it will damage the mirror or glass.

(c) Do NOT use ammonia-based cleaning products such as glass cleaner. These may erode the mirror's silver backing. Make sure to read the label of any such cleaning products before use.

(d) Avoid using cleaner which contains chlorine to wash the mirror and glass, especially the edge of the mirror and wooden sides.
